This figure is a geological map of a specific area, likely a 1:100,000 scale map. The map displays several distinct geological units, each represented by a unique color and pattern. These units include:

- Unit 1 (Orange/Yellow):** A large unit covering much of the central and southern parts of the map, characterized by a yellow/orange background with black dashed patterns.
- Unit 2 (Blue):** A narrow, elongated unit located in the lower-left portion of the map, featuring a blue background with white dashed patterns.
- Unit 3 (Green):** A small unit in the lower-left, with a green background and white dashed patterns.
- Unit 4 (Red):** A small unit in the lower-right, with a red background and white dashed patterns.
- Unit 5 (Yellow):** A small unit in the lower-right, with a yellow background and white dashed patterns.

The map also contains numerous structural features and borehole data:

- Structural Features:** Shown as black lines representing joints, fractures, and larger faults. Some joints are labeled with letters like R, V, E, L, and N.
- Boreholes:** Indicated by small black dots and labeled with identifiers such as 320, 328, 342, 330, 329, 340, 355, 360, and 370, followed by labels like R-IV, R-V, E-IV, E-V, and R-W.
- Geological Units:** Labeled with letters B, S, P, and J, representing different lithologies or facies.
- Topographic Labels:** Includes "Woj. Świętokrzyskie" and "N 52° 57' 17.4 E 21° 11' 10.6" at the top left, and "1:100,000" at the bottom left.
- Text:** A large pink text "Zad. 1 poł. 2" is written vertically along the left edge of the map.
